The History

West Point Foundry was founded in 1817 by Robert Parrott. The foundry was originally used to produce cannons for the United States military. However, it soon began to produce other products, such as locomotives, steam engines, and bridge spans.

During the Civil War, West Point Foundry played a major role in the production of war materials. The foundry produced cannons, shells, and other equipment for the Union Army. After the war, the foundry continued to

produce a variety of products, including bridges, locomotives, and steam engines.

In 1968, West Point Foundry was declared a National Historic Landmark. The foundry is now open to the public for tours.

The Architecture

West Point Foundry is a beautiful example of 19th-century industrial architecture. The foundry is made of brick and stone and features a variety of architectural details, such as arched windows, quoins, and a corbeled cornice.

The foundry is also home to a number of sculptures and other works of art. These works of art help to tell the story of the foundry and its workers.
