

# Substance, Process, and Policy: A Comprehensive Guide to Substance Use Disorders

Substance use disorders are a major public health problem. In the United States, over 20 million people have a substance use disorder, and over 100,000 people die each year from alcohol-related causes.

Substance use disorders can have a devastating impact on individuals, families, and communities. They can lead to physical health problems, mental health problems, job loss, homelessness, and crime.

The good news is that substance use disorders are treatable. With the right help, people can recover from substance use disorders and live healthy, productive lives.
